

XYXX Meta Ads Dashboard

Automated daily statics + videos performance dashboard and weekly Slack reports, powered by Meta Marketing API + GitHub Actions + GitHub Pages.

What It Does

- **Daily (9am IST):** Pulls last 7 days of ad performance from Meta API, refreshes preview URLs for top statics, rebuilds docs/index.html (statics) and docs/videos.html (videos)
- **Weekly (Monday 9am IST):** Builds summary report at docs/weekly/YYYY-ww.html and sends Slack notification with top performers

Setup (15 minutes)

1. Create the repo

Fork or create a new repo named xyxx-meta-ads-dashboard under your GitHub account.

2. Add GitHub Secrets

Go to **Settings** → **Secrets and variables** → **Actions** → **New repository secret**:

Secret name	Value
<code>`META_ACCESS_TOKEN`</code>	Your Meta long-lived access token (see below)
<code>`META_ACCOUNT_ID`</code>	<code>`act_1857340177852371`</code>
<code>`SLACK_WEBHOOK_URL`</code>	Your Slack incoming webhook URL

3. Get a Meta Long-Lived Access Token

Go to developers.facebook.com/tools/explorer

Select your XYXX app → Generate User Token

Add permissions: ``ads_read``, ``ads_management``

Exchange for long-lived token (valid ~60 days):

```
curl -X GET "https://graph.facebook.com/oauth/access_token
?grant_type=fb_exchange_token
&client_id=YOUR_APP_ID
&client_secret=YOUR_APP_SECRET
&fb_exchange_token=YOUR_SHORT_TOKEN"
```

Save the returned token as ``META_ACCESS_TOKEN`` secret

4. Enable GitHub Pages

Go to **Settings** → **Pages** → **Source: Deploy from branch** → **Branch: main** → **Folder: /docs**

Your dashboard will be live at:

https://YOUR_USERNAME.github.io/xyxx-meta-ads-dashboard/

5. Get Slack Webhook

Go to api.slack.com/apps → Create App → Incoming Webhooks

Activate and add to your `#performance-reports` channel

Copy the webhook URL → save as `SLACK\_WEBHOOK\_URL` secret

6. Trigger first run

Go to Actions → Daily Meta Ads Dashboard → Run workflow

File Structure

```
■■■ meta_api.py # Shared Meta API helpers
■■■ main_statics.py # Statics data pull
■■■ main_videos.py # Videos data pull
■■■ generate_statics.py # Statics dashboard HTML builder
■■■ generate_videos.py # Videos dashboard HTML builder
■■■ generate_weekly.py # Weekly report + Slack sender
■■■ config.yaml # Categories, thresholds, settings
■■■ requirements.txt
■■■ data/
■ ■■■ statics_daily.json # Latest statics data
■ ■■■ videos_daily.json # Latest videos data
■■■ docs/ # GitHub Pages output
■ ■■■ index.html # Statics dashboard
■ ■■■ videos.html # Videos dashboard
■ ■■■ weekly/ # Weekly report archive
■■■ .github/workflows/
■■■ daily.yml # 9am IST daily cron
■■■ weekly.yml # Monday 9am IST weekly cron
```

Updating Config

Edit config.yaml to:

- Add/rename categories (just match adset name keywords)
- Change top_n_per_category (default: 10)
- Adjust min_spend threshold (default: ■500)
- Change daily_lookback_days (default: 7)

Token Refresh (every ~60 days)

When Meta token expires, regenerate and update the META_ACCESS_TOKEN secret.

The dashboard will fail gracefully and log the error in GitHub Actions.

Dashboard URLs

- **Statics:** https://YOUR_USERNAME.github.io/xyxx-meta-ads-dashboard/
- **Videos:** https://YOUR_USERNAME.github.io/xyxx-meta-ads-dashboard/videos.html

- **Weekly Archive:** https://YOUR_USERNAME.github.io/xyxx-meta-ads-dashboard/weekly/

Monthly Report

Runs automatically on the **1st of every month at 9am IST**.

Covers the **full previous calendar month** — all ads, all categories, both statics and videos.

What it produces:

- docs/monthly/YYYY-MM.html — full deck with 750px statics previews + video thumbnails
- Highlights bar: best static ROAS, highest spender, best video ROAS
- 2-tab layout: Statics (with ★ Best / ■ Lowest badges per category) + Videos (ranked by ROAS)
- Slack notification with a "View Monthly Deck →" button
- docs/monthly/index.html — rolling archive of all past months

Monthly report URL:

https://YOUR_USERNAME.github.io/xyxx-meta-ads-dashboard/monthly/YYYY-MM.html

Full Schedule Summary

Job	Trigger	Covers	Slack?
`daily.yml`	Every day 9am IST	Last 7 days rolling	■
`weekly.yml`	Monday 9am IST	Last 7 days rolling	■ with top performers
`monthly.yml`	1st of month 9am IST	Full previous month	■ with monthly deck link
